

Heritage Meusum

Realizing that our heritage is vanishing due to the impact of intrusive cultures, the department made a humble beginning to establish a Heritage Museum with the active participation of the students who come from different nooks of the valley.

To encourage their participation in enriching the museum the contributions made by them are counted towards making their internal assessment. We have also initiated the process of building audio-visual cassette library to preserve lively our recent past and present for future historians and scientists of other disciplines interested in constructing contemporary history in its various dimensions.
